

Wesson & Harrington®

Rear sight base &

Stock weight offer

Owners of existing Wesson & Harrington® Buffalo Classic™ and 38-55 Target Model Rifles, who are members of this website can use this form to obtain two special offers from H&R 1871®, Inc. First, after much discussion, we are offering a steel dovetail mount which can be fit on the chamber area of either rifle. The mount is unblued and may be drilled to fit an existing hole or silver soldered in place. It has a standard 3/8" dovetail which can accept a variety of open sight styles.

Second, after watching discussion on the board regarding stock weight ideas, we will offer a factory stock weight bar weighing 1-1/3 lbs. along with a screw to affix the weight and instructions for mounting. This is the same weight we use in our 10 ga. 3-1/2" guns for recoil reduction and is the proper diameter for the tang bolt hole.

As always, members of this site get special pricing and free shipping. Just fill out and mail the attached form to H&R 1871®, Inc., 60 Industrial Rowe, Gardner, MA 01440
